

● MOBilize your privacy

Would you post client information here?

Did you know...

Your email travels the world – and anyone can read it. Email is copied from one computer server to another as it travels across the Internet. These copies may persist for days and you have no control over who accesses them.

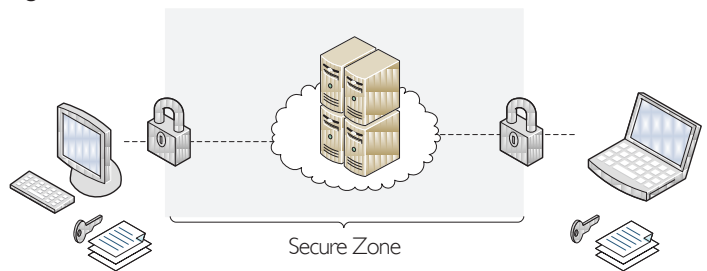

Email can tell lies. There is no easy way to verify a sender or receiver of an email. Impersonation is easy; eavesdropping is a relatively simple task, and anyone can send an email that appears to be from you.

Faxes are not so private either. There is no way to verify the sender or receiver of a fax, and faxes may be caught by whoever is in your client's office at the time. Besides, eFaxes are taking over, and they are merely insecure email.

Your computer is easy to read. Unless you have actively encrypted it, your data may be accessed by anyone on your network, in some cases without a password. Are you protecting your data and your clients' data? What happens if your computer falls into the wrong hands?

How safe is your communication?

- When a document leaves your firm—by email, fax, or even courier—are you in control?
- Do you know who is reading your clients' contracts when you send them out?
- Do you protect sensitive information at every stage in its life cycle: from creation to collaboration to storage?
- Are you in compliance with privacy and security legislation and guidelines?

Even we, as the storage host, have no way to decrypt users' valuable information

You CAN protect client confidentiality. And PROVE it.

My Own Bits Professional Services (MOB Pro) provides a completely private and secure method to transmit and collaborate on sensitive files with your clients. MOB Pro places you in control. You retain ownership and are able to send, share, validate or revoke access to any shared document at any point. MOB Pro secures your data and enables you to track it. All activity on a matter; every view, every change, every version and every secure file transmission is logged for your records. MOB PRO assures confidentiality by providing a completely private and secure means to transmit, collaborate, verify, and store sensitive documents. Only authorized users ever have access.

Nobody else can see your data. Not even us.™

Secure Transmission, Storage & Collaboration

Secure Transmission, Storage & Collaboration

MOB Professional Services (MOB Pro) is a simple and easy software package that enables professionals to share sensitive documents privately and securely with their clients, over the Internet. Only authorized users can ever access files protected by MOB Pro. Not even we as the service provider have the ability to see them.

Fully Secured and Private: No more unencrypted information on the Internet.

Highly Scalable: Virtually unlimited storage, file sizes, and tracking ability.

Controlled Collaboration: Permissions are set for documents, users and groups. Senders and Receivers are always verified.

Easy to Use: Simple setup and no maintenance.

Cost Effective: Pay for only the services you use.

- Share documents with clients and colleagues through a single custom application that ensures privacy and industrial-strength security – only the sender and receiver have access to their collaboration space. Not even us, the service provider; can decrypt your data.
- Documents are constantly up-to-date with automatic SmartVersion Control™
- Advanced audit trails enable previous document versions to be tracked and accessed
- Users easily manage permissions and groups to assure that only the intended recipients are able to read/write/or access data.
- Universal document availability provides accessibility even without Internet connectivity
- Unlimited storage capacity and redundant server backup provision leverages the scalability of online services

Client Confidentiality Assured

MOB Pro enables professional service firms to easily collaborate with clients using a private and absolutely secure document management system. MOB Pro requires minimal setup and virtually no maintenance. Information is available from anywhere, it is encrypted on the sender's computer well before it is saved on our servers, and decrypted only once it is safe with the authorized recipient. Not even we as the server host can access your documents. Our patent-pending technology assures that encryption keys are never stored or even transmitted in a readable format to the server. Only authorized users ever have access to them.

Provide true security and document control while enjoying advanced collaboration from anywhere to anywhere.

Realize savings of over \$30K annually versus self-storage and other insecure forms of file sharing technology.

Features	Benefits
Enterprise Level Encryption	Industrial grade encryption provides users with the assurance that their data is secure.
Automatic File Synchronization	Users automatically access the latest document versions.
Advanced Version Control	Previous versions of documents can be easily referenced and restored at any time. The Audit Trail feature enables users to generate a live report defining which users changed each document, and the timing of those changes.
Advanced Data Access Control	Users have full control over read, write and share permissions for each file. Time based controls enable permissions to be automatically changed or re-voked at pre-determined times.
User and File Management	User- document access can be easily set, changed, and revoked as needed.
Fault Tolerance Security	Server storage of documents is backed up and maintained to industry standards.
Scalable Storage Provision	There are virtually no restrictions to the numbers of files, sizes, and versions stored on the system. Storage space is effectively unlimited.
Online Availability	Storing encrypted data 'in the cloud' leverages the persistence and constant availability of redundant Internet-connected servers.
Offline Mode	Documents are cached locally on the computer. Files are accessible even when an Internet connection is not available.
SaaS Solution	The subscription-based service involves paying only for services used. All up-grades are transparent and free.
Legislative Compliance	Information can be stored in the jurisdiction of your choice. Compliant with PIPEDA and PIPA (BC) Acts relating to Data Privacy.
